

We look forward to presenting how uQualio® can work for you!

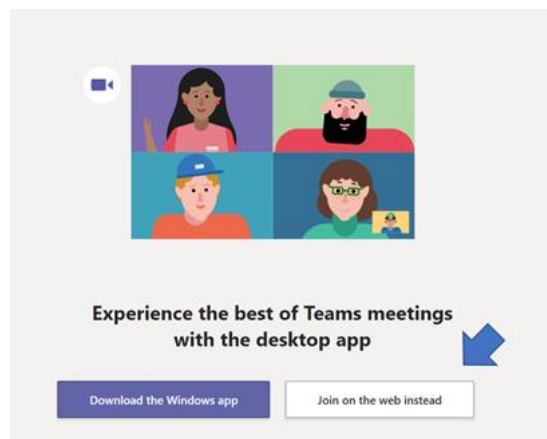

To give the presentation we use Microsoft Teams (which recently replaced Skype for Business).

Here is a short 'how-to' participate in a Microsoft Teams meeting.

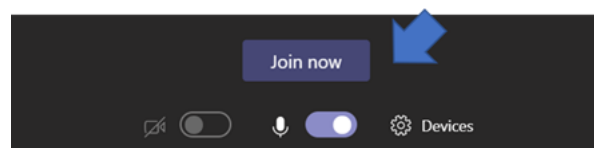

Just click on the following text in the invitation: Join Microsoft Teams Meeting.

You can use the web version of Microsoft teams Meeting where you don't need to install the program if you are not a user.

At the first page just click "Join on the web instead"

And then you just choose "Join now"

If this does not work we can also use ordinary Skype.

We look forward to the meeting with you!
